Solar plus storage solutions incorporate energy storage batteries for both solar storage and backup power. They also save costs on electricity during peak hours.

VG CoLAB develops innovative system-oriented technological solutions applying energy storage to enable the energy transition. Fuelled by industrial and

Portugal will launch a competitive tender for 750 MVA of battery energy storage before January 2026, as part of a broader ?400 million package aimed at improving grid reliability

VG CoLAB develops innovative system-oriented technological solutions applying energy storage to enable the energy transition. Fuelled by industrial and services sectors, it delivers mid-TRL

A grid-connected microgrid system that integrates battery energy storage systems (BESS) with various renewable energy sources like wind turbines, solar photovoltaic, and fuel cells (FC).

A complete battery energy storage system includes a lithium-ion battery, energy management system, monitoring system, temperature control system, fire protection system, and intelligent monitoring

The New Generation Storage (NGS) Innovation Pact is fully aligned with the European Union's energy transition strategy by 2040 and the challenge for complete electrification of mobility by 2035.

Discover how the Porto Novo compressed air energy storage (CAES) system bridges the gap between renewable energy generation and stable power supply. This article explores its ...
